Description <p>At protoDUNE, the Trigger Fragment Generator folks are storing a JSON string inside their FHiCL BoardReader configuration. Within their code, they are using the jsoncpp library to navigate through that JSON once they pull it out of the FHiCL.</p> <p>We should talk about ways to handle this sort of need.</p> <ul style="list-style-type: none">• is there a FHiCL-to-JSON converted in the artdaq-database package?• do we need to start including a JSON package in our software suite?
